IntellectAbility®
REPLACING RISK WITH HEALTH AND WELLNESS

What You'll Learn:

Health professionals will care for people with intellectual and developmental disabilities throughout their careers, regardless of specialty. However, many students receive limited formal education on the unique healthcare needs of this population. **This course package aims to bridge that gap.**

- Better understand common health conditions and risks experienced by people with IDD.
- Recognize that pain, illness, medication effects, or distress may present as a change in behavior.
- Reduce the risk of diagnostic overshadowing.
- Improve communication with people who communicate in different ways.
- Recognize early signs of potentially serious medical conditions.
- Understand the effects of polypharmacy.
- Apply person-centered and trauma-informed principles.
- Recognize concerns related to positioning, nutrition, swallowing, mobility, and medical equipment maintenance.
- Provide more informed, respectful, and effective healthcare to people with IDD.

Where Can I Access the Course Package?

All courses are delivered online through IntellectAbility's eLearning platform, so students can complete them at their own pace.
